Ref: ClaSS Study

Dear < patient name >

**The Chlamydia Screening Study**

Your records show that following your participation in the above study you have not returned for your result.

However, your sample has been examined and the test was found to be negative, this means we found no evidence of Chlamydia infection.

You do not need to do anything further, however you may be contacted in the future with regards to this.

Thank you very much for your contribution to this important study.

Yours sincerely

**Dr. (General Practitioner)**
